Thickness: 17mm, 23mm

Stock Colour: Natural Coir

Guarantee

- StarLux Coir comes with a 12 month guarantee against premature failure from manufactures defects.

Cleaning/Maintenance

StarLux Coir's deep pile, traps and conceals dirt so regular cleaning with a vacuum, or by shaking is vital to prevent dirt build up. Mats can be rotated to prolong wear.

Daily Maintenance

Regular vacuum cleaning when dry is essential to remove loose fibres and dirt. An easy way to clean StarLux Coir is to turn the mat upside down and use for a day, this shakes out dirt which can then be swept up.

Natural coir mats must be used inside or in weather protected exterior locations. Direct exposure to moisture will cause the mat to expand and swell.

Periodic Maintenance

Domestic solvents may be used to remove grease and dirt, however take care with industrial strength solvents which may cause damage to the PVC backing. StarLux Coir can also be hosed down and hung out to dry.
