Static	Anti-static
Fire resistance	Does not ignite easily
Durability	Heavy-duty
UV Resistance	UV does cause all rubber products to deteriorate over time.

## Data Sheet Treadman - 11/18

Moisture Behaviour	Nil, except to reduce anti-slip qualities.
Sound Absorption	Good
Safety	Excellent slip resistance when dry. Slip resistance is reduced when wet although still better than many other surfaces
Installation	<p>Can be loose laid in most situations.</p> <p>To glue down (for horse floats, etc.) the following procedure <b>must</b> be followed:</p> <p>Subfloor must be free of wax, dust and grease, must be clean and free of hydrostatic pressure.</p> <p>Rubber matting must be wiped on the side to be glued with a solvent to remove traces of silicone. This side must then be primed with Bostick Boscosal "S" following manufacturer's instructions. Let primer dry.</p> <p>Glue down with a suitable adhesive (e.g. Roberts 600) following manufacturer's instructions.</p>
Cleaning/ Maintenance	Water with mild detergent if required. Avoid strong detergents and chlorine.
Guarantee	Guaranteed for 5 years against premature failure due to manufacturing defects.
Supply	Advance has a national network of consultants and distributors. Please view our website at <b><a href="http://www.advancefloors.co.nz">www.advancefloors.co.nz</a></b> to locate your nearest stockist or phone toll free 0508 Advance (0508 238 262) New Zealand or 1800 51-52-53 Australia.
